Registration page Screenshot -

The screenshot shows a web browser displaying a registration page. The page has a dark header bar at the top. Below it, the main content area is light gray. In the center, there is a white rectangular box containing the registration form. The form is titled "Register" in bold. It contains four input fields: "First Name:", "Surname:", "Email:", and "Password:". The "Email:" field has the text "t@gmail.com" entered. Below the "Password:" field is a "Register" button. At the bottom of the form, there is a link that says "Already have an account? [Login here](#)".

### Legislation & Guidance

Understanding the laws and best practices around online safety is crucial. Here you can find detailed information about the legislation that protects users online.

### Key Legislation

- Children's Online Privacy Protection Act (COPPA)
- General Data Protection Regulation (GDPR)
- Communications Decency Act (CDA)
- Cyberbullying Prevention Laws
- Internet Safety Laws for Schools

### Best Practices for Online Safety

Follow these best practices to ensure safe and responsible use of social media:

- Always read and understand the terms of service of social media platforms.
- Use strong, unique passwords for each social media account.
- Be cautious of phishing scams and suspicious links.
- Regularly update privacy settings on all accounts.
- Teach children and teens about the importance of privacy and digital footprints.

    <h1>Privacy Policy</h1>
    <p>Last updated: 21/08/2024</p>

    <h2>1. Introduction</h2>
    <p>Welcome to Social Media Campaigns Ltd. This privacy policy explains how we collect, use, and protect your personal data when you use our website.</p>

    <h2>2. Information We Collect</h2>
    <p>We collect personal information that you voluntarily provide to us when registering on our website, expressing an interest in obtaining information about us or
```

our products and services, when participating in activities on the website, or otherwise contacting us.</p>

- <li><strong>Personal Data:</strong> Name, Email Address, Contact Information</li><li><strong>Usage Data:</strong> IP Address, Browser Type, Pages Visited</li><li><strong>Cookies:</strong> Session Cookies, Preference Cookies, Security Cookies</li></ul>

## <h2>3. How We Use Your Information</h2>

<p>We use the information we collect or receive to:</p>

- <li>Provide and operate our services.</li><li>Send administrative information to you.</li><li>Protect our services and enforce our terms, conditions, and policies.</li><li>Respond to legal requests and prevent harm.</li></ul>

## <h2>4. Sharing Your Information</h2>

<p>We may share your personal information in the following situations:</p>

- <li><strong>With Service Providers:</strong> We may share your information with third-party vendors, service providers, contractors, or agents who perform services for us.</li><li><strong>For Legal Reasons:</strong> We may disclose your information if we believe it is necessary to comply with legal obligations, protect your safety or the safety of others, investigate fraud, or respond to a government request.</li></ul>

## <h2>5. Security of Your Information</h2>

<p>We use administrative, technical, and physical security measures to protect your personal information. However, no electronic transmission over the internet or information storage technology can be guaranteed to be 100% secure.</p>

## <h2>6. Your Data Protection Rights</h2>

<p>You have the following data protection rights:</p>

- <li><strong>The right to access:</strong> You have the right to request copies of your personal data.</li><li><strong>The right to rectification:</strong> You have the right to request that we correct any information you believe is inaccurate.</li><li><strong>The right to erasure:</strong> You have the right to request that we erase your personal data, under certain conditions.</li></ul>

## <h2>7. Changes to This Privacy Policy</h2>

<p>We may update our privacy policy from time to time. We will notify you of any changes by posting the new privacy policy on this page.</p>

## <h2>8. Contact Us</h2>

<p>If you have any questions about this privacy policy, please contact us:</p>

```

## Screenshots of my database -

PHP codes for backend–

index.php – This is the starting point of this website. If user is already logged in it will redirect to homepage otherwise it'll direct to login page

```
<?php
session_start();

if (isset($_SESSION['email'])) {
    // User is logged in, redirect to home.html
    header("Location: home.html");
} else {
    // User is not logged in, redirect to login.html
    header("Location: login.html");
}
exit();
?>
```

config.php – Defines the connection to the MySQL database.

```
<?php
$servername = "localhost";
$username = "root";
$password = "";
$dbname = "smc_db";

// Create connection
$conn = new mysqli($servername, $username, $password, $dbname);

// Check connection
if ($conn->connect_error) {
    die("Connection failed: " . $conn->connect_error);
}
?>
```

contact.php- Handles form submissions and input sanitization in contact.html page

```
<?php
// Include the database configuration file
include('config.php');

// Check if the form is submitted
if ($_SERVER['REQUEST_METHOD'] == 'POST') {
    // Get the form data
    $name = mysqli_real_escape_string($conn, $_POST['name']);
    $email = mysqli_real_escape_string($conn, $_POST['email']);
    $message = mysqli_real_escape_string($conn, $_POST['message']);

    // Insert the data into the database
```

```

$query = "INSERT INTO contacts (name, email, message) VALUES ('$name', '$email', '$message')";

if (!filter_var($email, FILTER_VALIDATE_EMAIL)) {
    echo "<script>
        alert('Invalid email address.');"
        window.location.href='../contact.html';
    </script>";
    exit();
}

if (mysqli_query($conn, $query)) {
    // Redirect to a thank you page or show a success message
    echo "<script>
        alert('Thank you for getting in touch!');"
        window.location.href='../contact.html';
    </script>";
} else {
    // Handle the error if the query fails
    echo "<script>
        alert('There was an error submitting your message. Please try again.');"
        window.location.href='../contact.html';
    </script>";
}
}
?>

```

login.php - Password verification, session initiation, login attempts tracking, and account lockout functionality

```

<?php
session_start();
include('config.php');

if ($_SERVER['REQUEST_METHOD'] == 'POST') {
    $email = $_POST['email'];
    $password = $_POST['password'];

    $query = "SELECT * FROM members WHERE email='$email'";
    $result = mysqli_query($conn, $query);
    $user = mysqli_fetch_assoc($result);

    date_default_timezone_set('Your/Timezone');
    // $current_time = time();
    // echo "Current Unix timestamp: " . $current_time . "<br>";
    // echo "Formatted current time: " . date('Y-m-d H:i:s', $current_time) . "<br>";

    if ($user) {
        // Check if the account is locked
        if ($user['login_attempts'] >= 3) {
            $lock_time = strtotime($user['lock_time']);
            $current_time = time();

            // Debugging output
            echo "Stored Lock Time (from database): " . date('Y-m-d H:i:s', $lock_time) . "<br>";

            echo "Current time: " . date('Y-m-d H:i:s', $current_time) . "<br>";
            echo "Time difference: " . ($current_time - $lock_time) . " seconds<br>";

            if ($current_time - $lock_time < 600 && $lock_time > 0) { // 10 minutes = 600 seconds
                echo "<script>

```

```

        alert('Account locked. Try again later.');
```

```

        window.location.href='../login.html';
    </script>";
    exit;
} else {
    // Reset login attempts after 10 minutes
    mysqli_query($conn, "UPDATE members SET login_attempts=0 WHERE
email='$email'");
}
}

// Verify the password
if (password_verify($password, $user['password'])) {
    $_SESSION['email'] = $email;
    mysqli_query($conn, "UPDATE members SET login_attempts=0 WHERE
email='$email'");
    header("Location: ../home.html"); // Redirect to home page
    exit;
} else {
    // Increment login attempts
    $attempts = $user['login_attempts'] + 1;

    // Lock the account if 3 attempts are reached
    if ($attempts >= 3) {
        mysqli_query($conn, "UPDATE members SET login_attempts=$attempts,
lock_time=NOW() WHERE email='$email'");
        echo "<script>
            alert('Account locked due to multiple failed login attempts. Try
again in 10 minutes.');
```

```

            window.location.href='../login.html';
        </script>";
    } else {
        mysqli_query($conn, "UPDATE members SET login_attempts=$attempts WHERE
email='$email'");
        echo "<script>
            alert('Incorrect password.');
```

```

            window.location.href='../login.html';
        </script>";
    }
}
} else {
    echo "<script>
        alert('Username does not appear in the database.');
```

```

        window.location.href='../login.html';
    </script>";
}
}
?>

```

logout.php - Destroys the session and redirects the user to the login page.

```

<?php
session_start();
session_destroy();
header("Location: ../login.html");
exit();
?>

```

register.php - processes the registration form data from `register.html`. It validates the input, hashes the password, and stores the new user information in the database.

```

<?php
session_start();
include('config.php');

if ($_SERVER['REQUEST_METHOD'] == 'POST') {
    $first_name = $_POST['first_name'];
    $surname = $_POST['surname'];
    $email = $_POST['email'];
    $password = password_hash($_POST['password'], PASSWORD_DEFAULT);

    // Check if the email already exists
    $check_query = "SELECT * FROM members WHERE email='$email'";
    $check_result = mysqli_query($conn, $check_query);

    if (mysqli_num_rows($check_result) > 0) {
        // Email already exists
        echo "<script>
            alert('Email already registered. Please use a different email.');"
            window.location.href='../register.html';
        </script>";
    } else {
        // Insert the new user into the database
        $query = "INSERT INTO members (first_name, surname, email, password) VALUES
('$first_name', '$surname', '$email', '$password')";
        if (mysqli_query($conn, $query)) {
            echo "<script>
                alert('Registration successful! Please login.');"
                window.location.href='../login.html';
            </script>";
        } else {
            echo "<script>
                alert('Error: Unable to register. Please try again.');"
                window.location.href='../register.html';
            </script>";
        }
    }
}
}
?>

```

tips.php - handles database queries for fetch or manage tips based on user interaction.

```

<?php
include('config.php');

$action = $_POST['action'] ?? $_GET['action'];

if ($action == 'add') {
    $tip = $_POST['tip'];
    $query = "INSERT INTO safety_tips (tip) VALUES ('$tip')";
    if (mysqli_query($conn, $query)) {
        echo json_encode(['status' => 'success', 'message' => 'New safety tip added
successfully.']);
    } else {
        echo json_encode(['status' => 'error', 'message' => 'Error adding safety tip.']);
    }
} elseif ($action == 'delete') {
    $id = $_POST['id'];
    $query = "DELETE FROM safety_tips WHERE id = $id";
    if (mysqli_query($conn, $query)) {
        echo json_encode(['status' => 'success', 'message' => 'Safety tip deleted
successfully.']);
    } else {

```

```

        echo json_encode(['status' => 'error', 'message' => 'Error deleting safety
tip.']);
    }
} elseif ($action == 'edit') {
    $id = $_POST['id'];
    $tip = $_POST['tip'];
    $query = "UPDATE safety_tips SET tip = '$tip' WHERE id = $id";
    if (mysqli_query($conn, $query)) {
        echo json_encode(['status' => 'success', 'message' => 'Safety tip updated
successfully.']);
    } else {
        echo json_encode(['status' => 'error', 'message' => 'Error updating safety
tip.']);
    }
} elseif ($action == 'view') {
    $search = $_GET['query'] ?? '';
    if ($search) {
        $query = "SELECT * FROM safety_tips WHERE tip LIKE '%$search%'";
    } else {
        $query = "SELECT * FROM safety_tips";
    }
    $result = mysqli_query($conn, $query);
    $tips = [];
    while ($row = mysqli_fetch_assoc($result)) {
        $tips[] = $row;
    }
    echo json_encode($tips);
} else {
    echo json_encode(['status' => 'error', 'message' => 'Invalid action.']);
}
?>

```
